

Ideation Phase

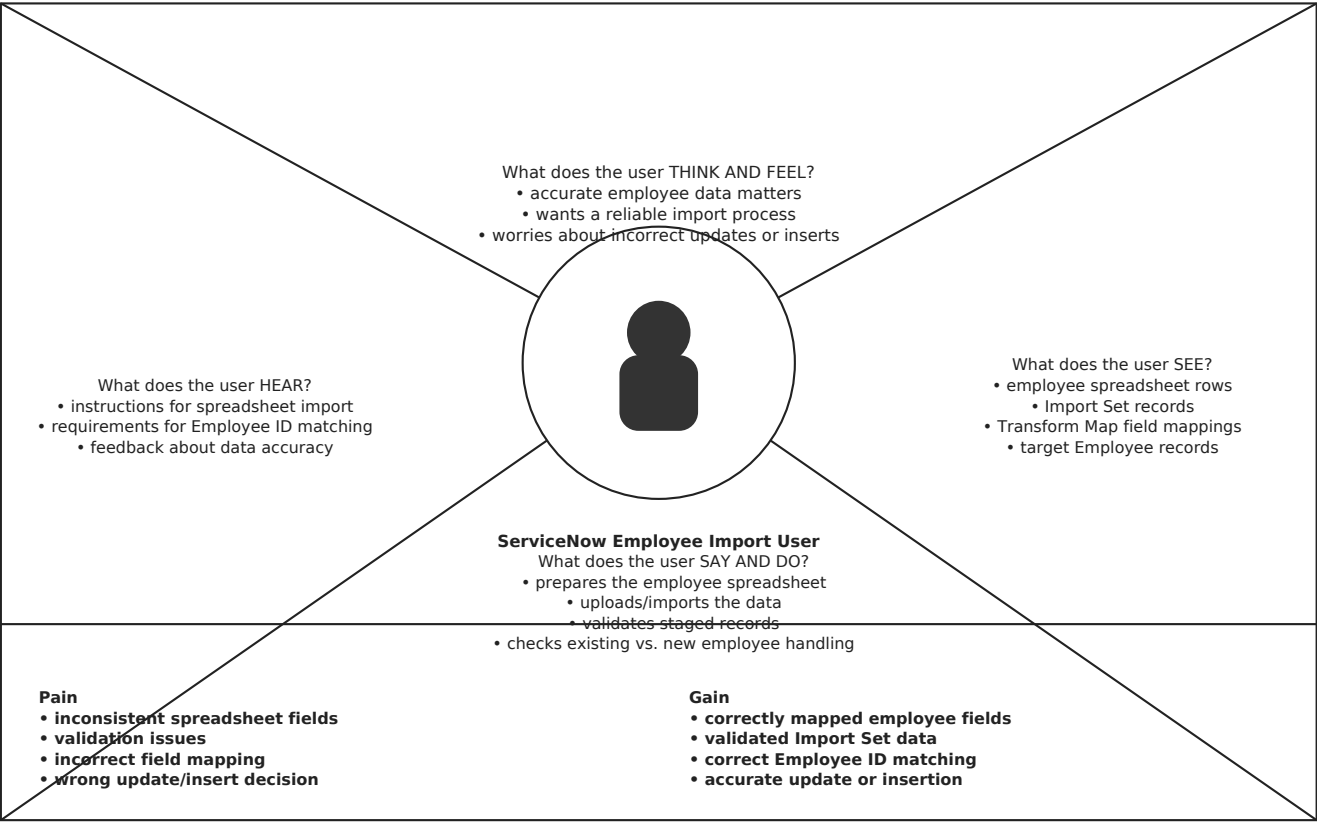

Empathize & Discover

Date	1 October 2026
Team ID	SWTID-2026-3453
Project Name	Import Data using Transform Maps (Spreadsheet)
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. For this project, the map represents the ServiceNow user who imports employee information from a spreadsheet using Import Sets and Transform Maps.

The map focuses on the user's goals and challenges around temporary data processing, validation, source-to-target field mapping, and Employee ID-based handling of existing and new employee records.

Reference: Empathy Map Canvas template structure adapted specifically for the project.
