

Focus on J&P, Reimagine	1. CUSTOMER SEGMENT(S) CS Who is your customer? ServiceNow users / administrators responsible for importing employee information from a spreadsheet into the Employee table.	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? Spreadsheets do not contain Employee ID values, required access to the ServiceNow system, and the need for manual checking of resulting Employee records.	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? The ServiceNow system, direct spreadsheet-based import, Import Sets, and manual checking of resulting Employee records.	Focus on J&P, tap into BE, understand RC	
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? Import employee information from a spreadsheet; stage and validate the data; map Employee ID / Name, Email, Department and Location; update matching employees; insert new employees.	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? Employee ID / Name, Email, Department Without controlled staging, field mapping and Employee ID matching, imported records are not handled correctly.	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? The customer prepares the spreadsheet, uploads it, reviews Import Set records, runs the Transform Map, and verifies the resulting Employee records.		
	3. TRIGGERS TR What triggers customers to act? A need to load a new employee list, refresh employee information, or synchronize spreadsheet data with the ServiceNow Employee table.	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, then describe how you solve the problem. Use ServiceNow Import Sets and a Transform Map to move employee spreadsheet data through a transform map and verify rows in the Import Set Table, validate the data, map Employee ID / Name / Email / Department / Location, and use Employee ID to update an existing Employee record or insert a new one.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE — What kind of actions do customers take online? Prepare the spreadsheet digitally, access ServiceNow through the web interface, upload/import records through transform map and verify Employee records.		
Identify story, trigger & emotion	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? Before: concern about incorrect imports, mapping errors or unintended record changes. After: confidence when rows are validated, fields are mapped correctly, and Employee ID handling produces the expected update or insert.				Extract online/offline C&P of BE
		8.2. OFFLINE CHANNELS CH 8.2 OFFLINE — What kind of actions do customers take offline? Collect or verify employee information with the relevant team, prepare the source spreadsheet details before importing them into ServiceNow.
